Italian Statistical Society (SIS)

Italian Statistical Society (SIS) promotes every two years an international scientific meeting. Both methodological and applied statistical research are considered in the meeting. The Italian Statistical Society was founded in 1939. Today there are about one thousand members including, among the others, scholars in statistical methodology, probability, social and economic statistics, biostatistics and demography. The members of the society are academics and scholars from public or private organizations. SIS organizes a biennial international specialized scientific meeting on a relevant statistical theme and several schools related to all statistical topics. It publishes an International Journal (SMA) and two on-line magazines.

Conference venue

The 45th SIS Scientific Meeting will take place in [University of Padua](#):

June 16, 2010 (morning)

Palazzo del Bo'

June 16, 2010 (afternoon)

Lecture halls in via Bassi

June 17 and 18, 2010

Lecture halls in via Bassi

The University of Padua

The University of Padua was founded in 1222, after a period when a number of professors and students left the University of Bologna.

Student life within the early university was organized in nationes, which reflected divisions according to geographical or ethnic origin; the various nationes themselves forming two larger groups: the Citramontani (that is, Italian) and the Ultramontani (that is, those from beyond the Alps).

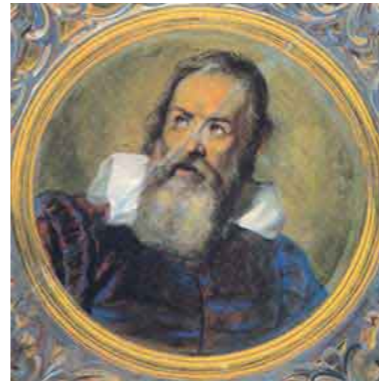

The 15th century would see the beginning of more than three hundred years of growth in prestige as the University of Padua benefited from the protection of the Venetian Republic. During this period Padua made its great contribution to the nascent scientific revolution, with developments in philosophical thought, in the study of medicine and anatomy and the great discoveries in astronomy, physics and mathematics that are linked with the 18-year period in which **Galileo Galilei** taught at the university (from 1592 to 1610). One particularly proud moment in the history of the university came in 1678 (June 25), when **Elena Cornaro Piscopia** gained her degree in Philosophy, becoming the first woman graduate in the world. A school of Statistics was founded in Padua in 1927. **Corrado Gini**, one of the most important Italian statisticians and first president of the National Institute of Statistics, taught here.

In recognition of the struggle against the Nazi occupation of 1943–45, the university would later receive the Gold Medal for Valour, the only university in Italy to gain such an award.

After the Second World War, the university has increased its contributions to the development of international scientific institutions. In recent years, it has also been able to meet the problems posed by overcrowded facilities by re-deploying over the Veneto region as a whole.

Session arrangements

The Scientific Program will include plenary, invited, contributed and poster sessions.

The Program Committee will allow SIS members to self-organize contributed sessions on research areas of common interest.

Further details will be made available on the Meeting web site.

Submission guidelines

Papers must be written in English according with SIS technical standards (see the web site).

The paper must exclusively be sent using the automatic system available in the deadlines & submission page of the web site.

Accepted papers can be exposed in an oral or poster presentation.

Posters must be written according to technical standards defined by the Organizing Committee.

For further details concerning submission, please see the relevant page on the Meeting web site.

Important deadlines

February 15, 2010	Paper submission
May 10, 2010	Early registration

For self-organized contributed sessions the same deadlines specified for contributed sessions apply.

Satellite sessions

Satellite sessions will also be organized.

The thematic areas, the chairmen, the instructions for participation and the dates of these sessions will be made available on the relevant page of the web site.

Registration

Registration can be made online by downloading the form available in the web site and following the registration guidelines.

A contributed paper will be included in the final program only if the registration fee will be paid by May 10, 2010.

Conference fees

Registration	Before May 10th €	After May 10th €
Regular fee	270	320
Junior members and PhD Students	150	150
Accompanying Persons	50	50

The payment can be made following the procedure which will be described in the Meeting web site.

The registration fee also includes the 2010 annual subscription to the Italian Statistical Society.

Organization

The 45th Scientific Meeting of the Italian Statistical Society will be organized by the Department of Statistical Sciences of the University of Padua.
